## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance per MPEP 1302
2. Claims 1-7, 9-22 and 23, 25, 26, 27, 28-44 in the application are deemed to be directed to a non-obvious Improvement over Iles (US patent number 3674383).
3. Claim 1 is drawn to a peristaltic pump having a rotor which directly squeezes a tube race which in turn indirectly squeezes the tube in the tube race. While Iles '383 discloses a peristaltic pump with tube guides it doesn't however disclose a tube race placed between the rotor and the tube to indirectly pump the fluid. More importantly Iles '383 does not teach a tube exiting and reentering a single tube race which comprises occluding surfaces that can be compressed by a single pump rotor. Thus In the examiner's opinion, it would not have been obvious to a person of ordinary skill in the art to introduce a plastic tube which exit and reenters a single tube race, the race comprising occluding surfaces that are compressed by a single rotor.
4. Claim 23 is drawn to the same invention as discussed in paragraph [3] above but is focused on the method of loading the tube holder based on the same apparatus disclosed in claim 1 and thus the same argument used in paragraph [3] above is used as the reason for allowance.
5. Claim 28 is drawn to a combination of tapered pump rotor and tube holder configuration described in claim 1, thus the same reason of allowance is given as stated above.

***Conclusion***
